1 Purpose

Denne rapport har til formål at præsentere eksempler på konfiguration af det udviklede standardfærge koncept. Nærværende rapport søger således at eksemplificere filosofien bag de tilbudte platforme samt præsentere moduler og sammensætningsmuligheder.

1.1 Background

Færgesekretariatet har på vegne af dets 18 medlemskommuner gennemført et udbud vedr. et innovationspartnerskab for udvikling af et standardfærgekoncept, som i maj 2021 førte til indgåelsen af aftale om et innovationspartnerskab mellem Færgesekretariatet og konsortieparterne Odense Maritime Technology A/S ("OMT") og PensionDanmark Pensionsforsikringsaktieselskab ("PD").

Konsortiet skal udvikle og tilbyde en standardfærgeplatform for medlemskommunerne, som tilsammen råder over ca. 32 færger, der primært sejler til de danske øer. Som dokumentation for arbejdet med udviklingen af dette koncept, udarbejdes denne rapport.

2 Eksempler på standardfærgekfigurationer

I det følgende præsenteres eksempler på konfigurationer af standardfærge platformen.
